

# Digital multifunction scale

## seca 684

▲ Safe weighing of standing, sitting or wheelchair patients .  
Stable handrail provides safe hold . Large, easy to access  
platform . Wheel barrier provides extra safety . Easy to read  
display . TARE, HOLD and damping function . Mobile due to  
integrated transport castors

# Weighing without restrictions

▲ The new multifunction scale seca 684 is seca's jack-of-all-trades. Due to its many functions, this scale is ideal for use in general medicine, nephrology and youth medicine in hospitals as well as in nursing homes. We have addressed the many needs of daily medical life through sophisticated and functional design. The result? A scale that makes your work easier, every day.

## Safe weighing of standing, sitting or wheelchair patients

On this scale patients can stand aided by a stable handrail, sit on the integrated folding seat, or remain in a wheelchair on the large platform. When standing, a stable handrail provides a safe hold for unstable patients. When sitting, a comfortable seat for minimally ambulatory patients can be raised and lowered with one hand. Special attention was given to making the scale easy to access, and a stop barrier for the front wheels of the wheelchair provides additional safety.

## TARE, HOLD and damping function

TARE and pre-TARE functions enable reliable net weight determination in spite of added weight, for example by deducting the known weight of a wheelchair. The practical HOLD function shows the weight even after the patient has left the scale. Damping compensates for small movements to give precise results. The weight is always easy for patient and caregiver to read from the swiveling display mounted at a convenient level.

## Useful details for perfect handling

The non-slip rubber coating and handrail add safety. With the integrated transport castors you can move the scale around. Sensible optional accessories: the scale can be fitted with the ramp seca 470 and the seca 460 RS232 interface – to transmit the measured data to a computer.

## Technical data

### seca 684

Capacity: 300 kg / 660 lbs  
Graduation: 100 g / 0.2 lbs  
Dimensions (WxHxD): 810 x 1,100 x 860 mm  
Platform (WxHxD): 800 x 46 x 850 mm  
Weight: 59 kg  
Calibration class: non-approved  
Functions: Pre-TARE with 3 memory cells, TARE, HOLD, BMI, damping, lbs/kg/sts switch-over  
Optional: Ramp seca 470, RS232 adapter set seca 460  
Power supply: Mains adapter
