## NorthShore Care Supply Announces COVID-19 Support for ICU Nurses

NorthShore Care Supply announced a program for ICU nurses and other COVID first responders in the U.S., including a free trial of two bags of adult diapers as well as a 20 percent discount on all absorbent adult diapers, protective underwear, bladder control pads and cleansing wipes available at its NorthShore.com website. ICU nurses and other COVID first responders

can take advantage of this program and receive their personalized free trial and discount by contacting NorthShore directly.

“We want to show our appreciation for the dedication of our medical providers and their heroic work during this pandemic,” says Adam Greenberg, president and founder, NorthShore Care Supply. “We’ve been contacted by a number of ICU nurses this year treating COVID patients who are struggling to meet the needs of their patients during extended shifts while managing with overactive bladder (OAB) or bladder or bowel incontinence. Due to the added restrictions of PPE, frequent toileting is just not an option for most ICU nurses today.”

The NorthShore® MEGAMAX™ diaper-style disposable briefs are uniquely designed for up to 12 hours of protection for extreme or total urinary incontinence. “Having peace of mind that leaks and odors will be contained with confidence is a life-saver for many people,” says Greenberg.

Bladder or bowel dysfunction affects around 100 million adults in the U.S. and often requires a combination of medical treatments and management devices for people to maintain their normal routine. When people are unable to use the toilet at normal intervals, it further puts a strain on the bladder muscles, which may already be weakened from life events or underlying medical conditions.

“Our healthcare workers are dealing with PPE shortage issues, overcrowded Emergency Rooms and ICUs, stress and long hours,” says Greenberg. “We can help make people’s lives and jobs just a little easier by providing the leak protection they need during the pandemic. Most hospital grade or store brand adult diapers are not designed for such extreme circumstances. However, NorthShore has developed some of the world’s most absorbent diapers after almost 20 years of experience serving the disabled and caregiver markets, including those with severe incontinence from conditions such as neurogenic bladder, kidney dysfunction, genetic disorders and Crohn’s & Colitis.”

### **About NorthShore Care Supply**

Founded in 2002, NorthShore Care Supply provides peace of mind to families managing with moderate to severe incontinence through life-changing absorbent products. The company is committed to #EndHealthStigma as we help 80 million Americans managing some form of bladder or bowel incontinence live their life to the fullest. Our featured NorthShore® brand is the leading premium adult diaper brand in the U.S.
